

Teifs WALL SYSTEMS

Teifs WEATHERTIGHT WALL SYSTEM

This multi-barrier system is highly effective at keeping out air and moisture. The Teifs lamina (reinforcing mesh, base coat and finish coat) is the first line of defense, beating accelerated weathering requirements by over 3,000 hours. Next, the patented TeifsDRAINBOARD® allows moisture to escape through drainage channels in the EPS board. TeifsWEATHERSEAL™, a special 100% acrylic air shield and water resistant protective coating, is applied over the substrate for added protection. In conjunction with proper flashing and sealants, all the components of the TeifsWEATHERTIGHT™ Wall System work together to ensure a substrate free from the damaging effects of weather and enhance the insulation value of your wall.
